

## I ordered 16 rolls of toilet paper

We needed toilet paper and there was none in the store. So, I went online, found this advertisement, and bought the carton of toilet paper.

*This was the picture in the ad that I responded to.*

1. What do you notice that is a little strange in this advertisement image?
2. What do you guess are the dimensions of the carton?
3. How did you make that estimate?

*This is a picture of two rolls of bamboo toilet paper surrounding my little Ruth Bader Ginsburg doll. She is  $5\frac{3}{4}$  inches tall.*

4. Judging by her size, what do you believe the length and average diameter of one roll of bamboo toilet paper is?
  
5. Now how big do you think the package of 16 rolls of toilet paper was that I found delivered to my mailbox?
  
6. Do I have a really big mailbox?
