

Will I have enough data or will I go over?

I received this message from my data provider.

I am worried about going over my data allotment and getting billed tons of money. I don't know much about cell phone usage.

1. What advice can you give to help me use less data?

2. At this pace will I have enough data or will I go over? At this pace, how much data will I use this month?

3. If I am on pace to go over then how much data can I use per day while not going over my limit?
