

## Madden Glitch

I didn't understand what Madden NFL was. I guess I'm one of the few people who don't play NFL video games. Evidently the latest Madden NFL game will be Madden 19 - meaning for the 2018-2019 season. The game creators, Electronic Arts (EA), have made some mistakes. When they learn of their errors, they create software patches to rectify the glitch. But until the repair patch is created, the glitch is the talk of the town.

1. What do you notice and wonder?

2. Please try to graph Le'Veon Bell's distance traveled over time.

3. Explain how you represented the part of the graph that represents the glitch. You can label or draw arrows to different parts of the graph.

4. Find the rate that Le'Veon traveled at different parts of his run.

5. Do you consider Bell's distance traveled to be a function of time? Explain your reasoning.
