1. Look over the menu. Which sandwiches look good? What sandwich would you order? Which size would you get?
2. Potbelly's is one of my favorite sandwich places. Last time I was there I couldn't decide between the original size and the "big" size. I wonder which size offers the best value? Is the price increase for a "Big" fair considering you get 30% more sandwich? Are the "Bigs" a good value? Explain or show your reasoning.
3. Find the "fair" price for any "Bigs" that are not fairly priced.
