

## Veterans per state

On Veterans Day we honor the men and women that have served in the Armed Forces of the United States. As of the latest census count, there are 18.8 million living veterans. We found these maps that show where veterans live in the U.S.

The maps represent two different way of measuring the Veteran population. **What do you notice and wonder?**

1. What states are you most likely to come across a Veteran? Explain your reasoning.
2. How might you explain the differences in counting the Veteran population in these two maps?
3. Based on the info from the two maps, which states have a relatively high population and percentage of Veterans? How can you tell?
