

World Largest Cup of Coffee!

The picture above shows a mug filled with coffee that recently set the world record for largest cup of coffee. The mug is shaped like a cylinder.

Your task is to determine *about* how much coffee this mug holds.

Things to consider:

- What do you need to know about the mug to find the volume of coffee that it will hold? How can you find this information?
- How will you express the volume of coffee that the mug will hold?
- Make sure to show your thinking and work below so that others can understand how you found the approximate amount of coffee the mug holds.
